PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building real-world applications using React, Node.js, and MongoDB. Skilled in developing REST APIs, implementing authentication systems, and integrating third-party services. Focused on building efficient, scalable applications with clean and maintainable code.

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React, Responsive Design, State Management (Context API), Component-Based Architecture

Backend: Node.js, Express.js, RESTful APIs, Authentication (JWT)

Database: MongoDB (Mongoose)

Tools & Platforms: Git, GitHub, Webpack, VS Code, Figma

Software Engineering Experience

Software Engineering Extern — OFCA (Non-Profit Client) | TripleTen

May 2025 – Aug 2025

- Built and improved features in a React-based web application using JavaScript (ES6+)
- Collaborated in a team environment using Git workflows, pull requests, and code reviews
- Debugged application issues and implemented features using REST API integrations

Projects

AWCleaning – Customer Service Web App (AI Chatbot with Gemini, React, React Router)

<https://github.com/ElijahSWilliams/AWCLEANING>

- Built a responsive multi-page React application using React Router for a real-world cleaning service
- Integrated Google Gemini API to develop an AI chatbot for handling customer inquiries and automated responses
- Implemented real-time conversational logic with reusable components and scalable application structure

Music Quiz App – Spotify API Game (React, Spotify Web API)

GitHub: <https://github.com/ElijahSWilliams/SongQUIZ>

- Built an interactive music quiz app using React and the Spotify Web API
- Implemented OAuth authentication to access user data and control playback
- Developed game logic with randomized song selection, scoring, and state management

What to Wear – Full-Stack Weather Outfit Planner (React, Node.js, Express, MongoDB, Google Cloud, OpenWeather API)

GitHub: https://github.com/ElijahSWilliams/se_project_react (Frontend),

https://github.com/ElijahSWilliams/se_project_express (Backend)

- Built a full-stack React app with a Node.js/Express backend deployed on Google Cloud
- Developed REST API with MongoDB for CRUD operations on user wardrobe data and implemented JWT authentication
- Integrated OpenWeather API to generate real-time, weather-based outfit recommendations

Paraprofessional, Substitute Teacher Service | Philadelphia, PA

04/2025 – Present

- Support children with diverse developmental and behavioral needs to promote positive learning and emotional outcomes
- Assist lead teachers with classroom preparation, activity facilitation, and daily operations
- Maintain a safe, inclusive learning environment through structured engagement, conflict resolution, and social-emotional support

Teacher's Aide — Childcare Careers | Philadelphia, PA

04/2025 – 10/2025

- Assist classroom teachers with instructional support and supervision of students in daily activities
- Help prepare educational materials and maintain an organized classroom environment
- Support student engagement through guided learning activities and behavioral reinforcement

Delivery Associate — STA Delivery LLC | Philadelphia, PA

11/2023 – 04/2025

- Completed timely and accurate deliveries while optimizing routes for efficiency
- Strengthened time management, problem-solving, and customer service skills in a fast-paced environment
- Conducted daily vehicle inspections to ensure safety and operational readiness

Student Teacher— Beyond The Bars | Philadelphia, PA

01/2020 – Present

- Provide individualized and group piano instruction tailored to student skill levels and learning goals
- Develop structured lesson plans to support progressive learning and skill development
- Strengthen communication, patience, and instructional delivery through ongoing student engagement

Backroom Processing Associate — HomeSense | Philadelphia, PA

12/2022 – 11/2023

- Assembled furniture with attention to detail and quality standards
- Assisted with inventory organization and maintained a safe, structured workspace
- Developed problem-solving skills through hands-on assembly and operational tasks

Software Engineering Certificate — TripleTen

12/2023 – 06/2025

- Full-stack software engineering program focused on JavaScript, React, Node.js, Express, MongoDB, and API development
- Built multiple real-world projects including full-stack applications, REST APIs, and authentication systems

JavaScript Certification — Community College of Philadelphia

09/2020 – 06/2022

- Completed coursework in JavaScript fundamentals, programming logic, and web development basics
- Developed foundational understanding of front-end development and problem-solving with code
